flexible mailer with extensive facilities for checking incoming e-mail.

## **Exim - Wikipedia**

A stock Unix-like server already has internal mail, more traditional ones also come with a full MTA already part of the standard installation. To allow the server to send external emails, an MTA such as Sendmail, Postfix, or Exim is required. Mail is read either through direct access (shell login) or mailbox protocols like POP and IMAP.

## **Comparison of mail servers - Wikipedia**

Exim limits the number of SMTP connections it allows at the same time to stop the server being overwhelmed, but on a busy server, the default cPanel setting of 100 concurrent connections might be too low. The limit is controlled by the "smtp\_accept\_max" directive in Exim's configuration file.
